Info: Delivery Charges

All charges will be charged in Zambian ZMW
at the current market rate of exchange.

Please contact our offices for the current daily ROE.

All hazardous parcels, such as items containing
Lithium-ION batteries and liquids, will be charged
by gross or volumetric weight, whichever is greater.

The minimum weight is 0.5kg.

These parcels will also have an extended transit time,
due to the nature of the cargo, which can not be sent
via our express courier service, but only by the
standard air-freight service.

All parcels from USA are charged by gross or,
volumetric weight, whichever is greater.

The minimum weight is 0.5kg.

Quotation can be provided for larger shipments in
advance.

Please send an email with the weights & dimensions
to: uk@ishop-worldwide.com

All rates include local VAT.

*Rate applied per additional half kilo over 10kg,
may vary due to the additional VAT.

How is volume weight calculated?

Length x Width x Height (cm) ÷ 6000
= Volume Weight
